

Infinity[®] Symphony Suite

Now you can be away from your patients – without being out of touch with their vital information. With Infinity Symphony Suite, you can remotely access information stored on the Infinity CentralStation, such as Full Disclosure, Event Disclosure and patient trend data.

MT-7176-2006

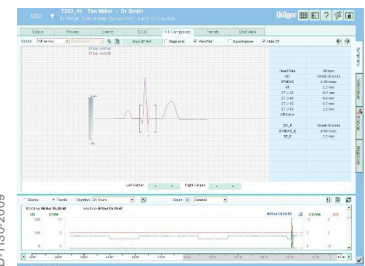

Infinity Symphony Suite is a Web-based application that expands your access to valuable patient information stored on the Infinity CentralStation database by making it available virtually anywhere via the hospital network. When deployed with Infinity Gateway, Infinity PatientWatch and VentWatch[®], Infinity Symphony provides near-real-time views of monitored patient information and ventilation data – with a single sign-on and integrated patient selection.

Infinity Symphony now features the Infinity WebPortal, which simplifies your workflow by providing one platform for Dräger Web-based applications, as well as ST Complex Review capabilities, Electronic ECG calipers and the ability to export waveforms.

Because it is Web-based, Infinity Symphony has minimal deployment and maintenance costs. It leverages your existing hospital IT investment – while expanding your access to patient information. Infinity Symphony supports privacy and confidentiality initiatives related to patient data, and simplifies system administration by using Microsoft[®] Windows[®] user accounts for authentication.

FEATURES

- Infinity WebPortal that integrates Infinity PatientWatch and Innovian[®] into one easy-to-use client platform that saves time with patient, user and time contexts
- ST Complex Review feature that lets you review ischemic events by displaying averaged ST complexes in multiple formats
- Web-based electronic ECG calipers that let you make ECG-related measurements remotely
- Web-based remote view of vital signs data
- Display of up to 72 hours of a maximum of 16 waveforms – including ECG, respiratory, hemodynamic and EEG
- Support for pacemaker spikes
- Trend review and access to up to 1,000 arrhythmia and alarm events per patient
- Advanced patient navigation with time anchor and ability to view direct correlation of events to trends

D-1130-2009

ST Complex screen
Displays zoom-in on median complex showing ST-related caliper measurements

D-1181-2009

Waves screen
Shows up to 72 hours of continuous waveform data, including hemodynamic, respiratory, ECG and EEG waveforms

FEATURES CONTINUED

- Auto filter to show only event lines with actual events in the Patient Navigator Panel
- Ability to generate a wide variety of chart-ready reports in PDF format – including Patient Status, Full Disclosure Strips, Trends, Events and Multilead Simultaneous ECG, Event Summary
- User Audit Trail to track user actions
- Edit Privileges and Electronic Signature to restrict writing access to the Infinity CentralStation database
- Enhanced patient privacy

TECHNICAL DATA

Infinity Symphony Server Software Platform (requirements) VF7

32-bit X86 or 64-bit X64 processor, 1.4 GHz or better

2 GB RAM, 60 GB hard drive

Windows Server 2003 R2 with SP2 32-bit X86 version

Windows Server 2008 R2 64-bit, Enterprise or Standard

Microsoft .NET 3.5

CD-R or DVD-R Drive

Minimum of 1 USB port for license key

Dual 10/100 Base T PCI bus Ethernet adapters for connection to Infinity Network and hospital network

1280 x 1024 display to avoid screen scroll bars

Microsoft IIS Web Server 6.0 or 7.5

Uninterruptible power supply (optional, however recommended for continuous operation during brief losses of power, and to protect system from power line disturbances)

One Symphony Server connects up to 8 Infinity CentralStations VF8.4 or later and a maximum of 32 simultaneous concurrent users

Infinity Symphony Remote Client Platform (requirements)

Windows XP with SP2 or SP3, Windows 7 Professional or Ultimate

Microsoft .NET Framework 3.5

512 MB RAM

Ethernet Adapter

Microsoft Internet Explorer 7 or 8, 32-bit

Adobe Acrobat Reader 8 or 9

1280 x 1024 display to avoid screen scroll bars

Note: 1 client license included with server

Security recommendations

The use of an antivirus program is strongly recommended for the Symphony Server and all client PCs. Prior to installing any Microsoft Hot Fixes and Microsoft Product Service Packs, please contact your local Dräger Medical Service Representative to ensure compatibility with Dräger Medical IT products.

Microsoft Software Licensing

Dräger does not supply the Microsoft software licenses required for operating our product on server systems or accessing our product from client PC systems. Please consult with your Information Technology department and your Microsoft licensing vendor to determine the appropriate action to take in regard to obtaining the required licenses.

ORDERING INFORMATION

Infinity Symphony Server Software	MS16753
Infinity Symphony Single User License	MS16752
Infinity ST Review License	MS24668

Classification

Infinity Symphony is an EU/Class II medical device per Rule 12 of MDD
